### DETAILED ACTION

1. Applicants' remarks filed on 2/11/2004 have been entered. Claims 1-8 are pending.
2. The rejection of claims 1-8 under 35 U.S.C. 103(a) as being unpatentable over Bohn et al (USPN 6,306,917) in view of Benham et al (USPN 6,534,552) is maintained for reasons for record recited in the office action mailed on June 13, 2003.
3. Applicant's arguments filed on 2/11/2004 have been fully considered but they are not persuasive. Applicant states that the examiner reconstructed the claims using impermissible hindsight. As stated in the previous office action the examiner notes that the tail gas is the by-product of the hydrocarbon synthesis reaction, and Bohan expressly teaches that after removing the carbon dioxide from the tail gas, the tail gas is recycled to the partial oxidation reactor (see col. 4, lines 4-8 and Figure 1). Therefore, the addition of tail gas to the gasification reactor is well known and is being taught by Bohan.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1621

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
